EFFECTIVE

FLUORINE COAT FS-101

WHAT

Bianco Japan's Fluorine Coat is a specially formulated solution designed to bring back dirty, faded, and chalked surfaces to a like new look and protect them for years to come. With a simple application of this unique coating surfaces will repel dirt and resist damaging UV rays. After only a few moments of gently scrubbing you can actually see the original colors underneath coming to the surface. In combination with the Aluminum Cleaner, Stainless Steel Cleaner, or Glass Cleaner, it provides a layer of protection to keep the surface clean.

FOR USE ON

Painted Surfaces
Metal
Plastic

REMOVES

Not for use on walking surfaces, slipping hazard (stairs, floors)

After long storage, shake well before use

Effectiveness does not deteriorate with storage

SAFETY

Always use proper safety equipment when handling chemicals

In case of spills wash with water and dry with towel

In case of eye contact rinse with water and seek medical aid

Drink lots of water and seek medical aid

See MSDS for more details

INSTRUCTIONS

1. Apply the Fluorine Coat to the target area. Scrub gently using a sponge scrub pad until dirt is removed. Work in small sections for best results.

2. After wiping excess coating off of surface rub briskly with clean, dry towel to polish surface and finalize coating.

3. Allow a few moments for the coating to penetrate and dry.

TOOLS

Use a sponge scrub pad to clean surface.

Use a clean, dry towel to dry and polish surface.
