EFFECTIVE

## GLASS CLEANER US-101

### WHAT

Bianco Japan's Glass Cleaner has been specially formulated from simple acids to quickly and easily remove tough buildups of lime scale, mineral and dirt buildups on mirrors, polycarbonate and glass. No longer do you have to resort to harsh cleaners that contain HCl or abrasives and leave the surface streaked and scratched. With this cleaner, made from low concentrations of common acids such as citric and lactic, safely remove the milky white buildups that you thought would be there forever. Use our Glass Cleaner for yourself and discover what a safe, easy to use, and effective product it is.

## NOTE

Before use test on hidden area

Be sure to use pad that will not scratch surface

Do not leave on for extended periods of time, rinse with water

Before use on specialty coated glass consult distributor

Not for use on windshields

## SAFETY

Always use proper safety equipment when handling chemicals

In case of spills wash with water and dry with towel

In case of eye contact rinse with water and seek medical aid

If consumed drink lots of water and seek medical aid, do not induce vomiting

## INSTRUCTIONS

1. Spray target surface with Glass Cleaner

Apply to small sections at a time to ensure best affect

2. Allow the cleaner a few moments to penetrate the surface then scrub gently in circular motions using an appropriate pad until unwanted dirt is removed

3. Rinse surface thoroughly with water and dry with towel

## TOOLS

Use a fine grit sponge pad for normal and hard to scratch surfaces

A very fine grit diamond pad should be used on easy to scratch and delicate surfaces
